1. Draw 4+1 View Architecture and explain.
2. List and explain UML common mechanisms.
3. Explain MDA.
4. Explain UP structure with all four phases.
5. Difference between UML and UP.
6. Draw a use case diagram for a financial trading system. system is used by an accounting system for updating accounts. IT allows analysis of trading by traders . The trading manager uses it to set limits on price deals. A trader arrives at price deals after checking with the valuation service of FTS. This valuation service is also used in analysis of trading risks. A salesperson uses the price to capture deals with a trader , capturing a deal may sometimes need previously set limits to be exceeded.
